Artikelübersicht

VARIO FIX I (40-143)
70 x 295 x 148 mm

VARIO FIX II (44-242)
70 x 295 x 148 mm

CONSTRUCTION BEAM
80 x 60 mm L: 400 cm

CONSTRUCTION BEAM
40 x 60 mm L: 360 cm

CONNECTOR
for construction beams
28 x 16 mm L: 360 cm

RUBBER PAD
300 x 300 mm,
Thickness: 3/5/10 mm

ATTACHMENT / COMFORT PAD
for improved stepping comfort
(additional height of 50 mm)

PERFORATED TAPE
L: 10 m (on a roll)

ASSEMBLY CLIP
78 x 40 x 20 mm

FASTENING SCREW
M6 x 16 MM for perforated tape,
with nut and washer

**LOCKING CLAMP and
LOCKING EDGE CLAMP**
incl. screws (4 x 30 mm)

CLIP and EDGE CLIP
incl. screws (4 x 30 mm),
screw bit TX 20

GROOVE BRIDGE
55 x 8 x 10 mm, for fastening the
locking clamp on a construction
beam gap

DISTANZ FIX
incl. screws (4 x 30 mm),
for closed gap
(CLASSIC, PREMIUM,
PREMIUM PLUS)

ARRIETIER FIX
for locking the butt joints
at the correct height

SCREW SET
4 x 30 mm

RETAINING BAND
L: 25/100 m (on a roll),
self-adhesive

GROOVE STRIP
L: 25/100 m (on a roll),
for closed gap
(CLASSIC, PREMIUM,
PREMIUM PLUS)

GAP PROFILE P5
L: 25/100 m (on a roll),
for closed gap
(CLASSIC Varia)

HOUSE CONNECTION PROFILE
incl. foam profile (compression band)
21 mm L: 400 cm
silver, bronze, anthracite
25 mm L: 400 cm
silver, anthracite

RHOMBUS PROFILE
as closing strip
20.5 x 81 mm L: 420 cm
available for all board colours

FASTENING SCREW
M8 x 40 MM and M8 x 80 MM
(bolt with nut and washer)
for rhombus profile (as closing strip)

SCREW M6 x 40 MM
for fixing short pieces of boards
when making bevelled or mitre
cuts as well as installing ventilation
grilles

ZAMMER / ROLLI
for the locking clamp fastening,
Zammer attachment for the
retraction of the gap profile P5

DISTANCE KEEPER
Installation aid for setting
the board gaps
(approx. 5 and 8 mm)

Further information on the installation of megalite LED lights can be found here:
www.megawood.com/en/megalite

**megalite
LIGHT SYSTEM**

LED-LINEAR-LIGHTS
H: 21 mm; W: 62 mm
L: 3.600 mm (27 W, 729 lm)
4.800 mm (36 W, 972 lm)
6.000 mm (45 W, 1215 lm)
27 lm/W; 24 V DC IP65
Aluminium/plastic

LED-SPOT MINI/MAXI
Ø 34 mm (0.25 W, 10 lm)
Ø 60 mm (0.5 W, 28 lm)
24 V DC IP67
Stainless steel

- Install spots maximally 50 mm away from a construction beam. If necessary, lay an additional beam.
- Mount the horizontal linear lights like boards and the vertical linear lights like closing strips.
- The linear lights can be shortened individually and are therefore easily adaptable to the size of the deck.

Additional accessories: Radio control set, repeater, splitter and extensions for the connections

Planning principles

GENERAL INFORMATION

- The basis for all installation variants is the megawood® construction plan! No warranty in case of deviations from the construction plan or when using non-original megawood® articles!
- In accordance with the principles of constructive wood protection, the decking boards should be laid lengthwise with a sufficient slope so that water is always directed away from the deck. If these instructions are followed, you will reduce the build-up of organic substances, water stains and waterlogging.
- For deck structures with an open gap, a minimum slope of 2% is recommended. For structures with a closed gap, a minimum slope of 2% is mandatory.
- The unique geometry of the DELTA decking board with cross-structuring makes it possible to lay the boards without any slope at all.
- Always ensure sufficient under- and rear-ventilation, e.g. with the megawood® ventilation grille.
- Use our **PREMIUM 21 x 242 mm decking boards** (with 40 cm centre distance) or **DYNUM 25 x 293 mm decking boards** (with 65 cm centre distance) for applications that require building approval (abz Z-10.9-506).
- When building the terrace, wind load must be taken into account as a lifting load in the construction.
- For special constructions that deviate from this construction plan or from the online planner, it is necessary to consult with the manufacturer and obtain the appropriate approval in order to maintain a possible warranty claim.
- Ensure that the decking can expand without being constrained (boards must be at least 20 mm away from fixed components).
- Rod-shaped components that are attached to a rigid surface using screws always have the fixed point in the centre and are mounted so that they can shift outwards in order to compensate for thermal expansion and expansion due to water absorption.
- **Predrill all holes before screwing.**
- When using metric screws, always pre-drill all holes so that the part to be fixed is 2 mm larger and the holding drill hole is exactly 0.5 mm smaller than the screw diameter!
- Select the material variants of punched parts, such as normal steel or stainless steel for staples and clips, to suit the structural conditions.
- All dimensions are to be checked on site!

PREPARATION AND SUBSTRUCTURE

- Create an **soil formation level** that is 500 mm larger all around than the decking, with a 4% slope.
- Avoid waterlogging by means of sufficiently dimensioned drainage! The formation of water-bearing layers is an integral part of the planning and execution. These are to be professionally designed by the respective planner and professionally implemented by the executing contractor.
- Create a stable and frost-resistant **gravel or crushed stone bed** with a 2% slope and level with fine grit (to even out any unevenness).
- Lay construction beams swivelled towards each other.
- Do not fill the cavities between the construction beams, concrete kerb-stones or VARIO FIX!
- Avoid ground contact of megawood® decking boards and construction beams! (Exception: articles from the construction timber programme in free-standing vertical installation)
- The substructure with connector allows the construction of terraces larger than 12 x 12 m without the need for an expansion joint.

DECKING BOARD ASSEMBLY

- Colour, brush and planing differences in the boards are intentional and emphasise the natural wood look. To enhance this effect, mix the boards before laying them. If specified, the laying direction must be observed (see arrow in the board groove or on the label!)
- Rhombus profiles have a matt surface and therefore differ from the decking boards colours.
- Do not exceed a maximum of 50 mm plank overhang above the sub-structure!
- Take into account and check the assembly and production-related dimensional tolerances of length, width and thickness during assembly!
- Boards may warp due to high internal stresses if cut to width on the side. Use flooring and clamping tools during installation.
- The boards should be cut at right angles and all cut edges should be chamfered for constructive wood protection.
- Do not expose products made of rubber-containing materials (groove strip, gap profile P5) to higher thermal loads, and lay them at the same temperature level as the boards. Do not store in direct sunlight. Recommended laying temperature 5° - 25°C. Do not pull or stretch.

! You should provide shade for your terrace on hot summer days when the sun is at its strongest. This protects children's sensitive feet from overheating surfaces. It also prevents skin damage caused by excessive UV radiation. Being aware of how to protect yourself from strong sunlight guarantees a carefree experience.

Deck covering I

CLASSIC

Combination board, finely corrugated surface on one side, grooved on the other side, brushed on both sides, 8 mm gap (closed gap with groove strip possible)

21 x 145 mm (STANDARD) | L: 300/360/420/480/540/600 cm
21 x 242 mm (JUMBO) | L: 420/480/600 cm

Colours	Rhombus profile
NUT BROWN	NUT BROWN
NATURAL BROWN	NATURAL BROWN
BASALT GREY	SEL GRIS
LAVA BROWN*	VARIA CHOCOLATE BLACK
SLATE GREY	VARIA GREY

* Colour Lava Brown only for CLASSIC 21 x 145 mm

PREMIUM | PREMIUM PLUS

oscillating planed top side, brushed underside 8 mm gap (closed gap with groove strip possible)

21 x 145 mm (STANDARD) | L: 420/480/600 cm
21 x 242 mm (JUMBO)* | L: 420/480/600 cm

Colours	Rhombus profile
NATURAL BROWN	NATURAL BROWN
NUT BROWN*	NUT BROWN
BASALT GREY**	SEL GRIS
LAVA BROWN PLUS**	VARIA CHOCOLATE BLACK
SLATE GREY (PLUS)**	VARIA GREY

* The national technical approval (abz) with 40 cm centre distance only for PREMIUM 21 x 242 (Jumbo) in Nut Brown and Basalt Grey structure!
** Flame retardant cfl-s1 only for PREMIUM PLUS 21 x 145 mm and 21 x 242 mm

SIGNUM

one-sided, oscillating planed and polished surface with a colour gradient, 5 mm gap (only open deck possible)

21 x 145 mm (STANDARD) | L: 360/420*/480*/540/600* cm
21 x 242 mm (JUMBO) | L: 360/420/480/540/600 cm

Colours	Rhombus profile
MUSKAT	VARIA BROWN
TONKA	VARIA GREY
ANISE**	ANISE
MALJU GREY***	SEL GRIS
MENTHA NIGRA***	MENTHA NIGRA
VARIA CHOCOLATE BLACK***	VARIA CHOCOLATE BLACK

* Colours Anisse, Malju Grey, Mentha Nigra and Varia Chocolate Black only for SIGNUM 21 x 145 mm in the lengths 420/480/600 cm
** Flame retardant cfl-s1 only for SIGNUM 21 x 145 mm in the colours Anisse, Malju Grey, Mentha Nigra and Varia Chocolate Black

Deck covering II

CLASSIC

Combination board, finely corrugated surface on one side with colour gradient, grooved on the other side with colour gradient and medullary ray, 8 mm gap (closed gap with groove strip possible)

21 x 145 mm (STANDARD) | L: 420/480/600 cm

Colours	Rhombus profile
VARIA GREY	VARIA GREY
VARIA CHOCOLATE BLACK	VARIA CHOCOLATE BLACK

CLASSIC VARIA

one-sided, partially grooved and matted surface with colour gradient, 5 mm gap (closed gap possible with gap profile P5)

21 x 195 mm (STANDARD) | L: 420/480/600 cm

Colours	Rhombus profile
VARIA CHOCOLATE BLACK	VARIA CHOCOLATE BLACK
VARIA GREY	VARIA GREY

DELTA

one-sided, matted and textured surface, some colours with colour gradient, 5 mm gap (only open deck possible)

21 x 145 mm (STANDARD) | L: 420/480/600 cm

Colours	Rhombus profile
INGWER	SEL GRIS
LORBEER	LORBEER
VARIA GREY*	VARIA GREY
VARIA CHOCOLATE BLACK*	VARIA CHOCOLATE BLACK

* Colour gradient only for colours Varia Grey and Varia Chocolate Black

DYNUM

one-sided, textured and matted surface, 5 mm gap (only open deck possible)

21 x 242 mm (JUMBO)* | L: 420/480/600 cm
25 x 293 mm (MAXI)** | L: 420/480/600 cm

Colours	Rhombus profile
NIGELLA**	VARIA GREY
CARDAMOM**	VARIA CHOCOLATE BLACK
INGWER*	INGWER
SEL GRIS*	SEL GRIS
LORBEER*	LORBEER

* Colours Ingwer, Sel Gris and Lorbeer only for DYNUM 21 x 242 mm
** The national technical approval (abz) with 65 cm centre distance only for DYNUM 25 x 293 mm in Nigella and Cardamom

Online Planner

This basic construction plan explains the standard installation options for rectangular decks with lengthwise installation. Special shapes, mitre cuts, bracing and diagonal installation are individually displayed in our megaplaner.

Care and Cleaning

CARE INSTRUCTIONS

After the successful construction of your megawood® deck, you should do a basic cleaning to remove production dust. A slope of at least 2% during construction helps to improve water drainage and minimise deposits. For a well-kept appearance, we recommend a basic cleaning twice a year, or more often if necessary. Temperatures above 15°C are ideal to make cleaning easier. Please proceed as follows:

1. Sweep dry, loose dirt from the decking.
2. Water the entire deck sufficiently and keep it damp for at least 15 minutes.
3. Clean the decking with water and a standard scrubbing brush or root brush.
4. If it requires a great amount of cleaning, use a rotating surface cleaner as well.
5. Rinse the patio deck thoroughly with clear tap water, wipe off with a squeegee and allow to dry.

Many stains will disappear over time with the help of sun and rain. For more stubborn stains, you can also use our liquid cleaner **GCC Pure Wash** for boards made of GCC HOLZart and GCC HARZart. For very stubborn stains, you can use only on boards made of GCC HOLZart our **scouring powder** with the GCC scrubbing brush (corundum scrubbing brush). Please note the usage instructions on the labels and in our terrace pass.

TERRACE PASS

REAL NATURAL FIBRES

Due to the raw material, small inclusions* of bast and natural fibres may occur. These may appear on the surface after weathering due to water absorption. Through use of the terrace, the particles will largely disappear over time. If they are found to be disturbing, they can also be removed mechanically. This does not impair or damage the product.

*In accordance with the ENP, the particles that are visible from standing eye level under vertical incidence of light are used for assessment. The particle size must not exceed 0.5 cm². A maximum of 0.03 % of the surface may be affected.

natural fibre inclusion before treatment

natural fibre entrapment after mechanical treatment
